

## On the Subject of Shuffled Strings

*Sort it out!*

- When the module activates, you will be presented with one of the 10 strings below, but with the characters shuffled around.
- You will have 50 seconds to put the string in the correct order, which will automatically deactivate the module.
- To swap two characters, simply click on one and then the other, and they will automatically swap positions.
- Failure to put the characters in the correct order within 50 seconds will incur a strike, which means you're now one step closer to death :)

### List of Strings

- ABCDEFGHIJ
- TSRQPONMLK
- UVWXYZABCD
- 1234567890
- ABCDE12345
- 24680ZYXWV
- 13579ACEGI
- 12358KMNQT
- AZBYCXDWEV
- 2019PQRST
- ABCZYX1230
